SUMMARY

Aspiring Software Developer and Data Analyst skilled in Java, Python, SQL, and DBMS, with hands-on experience building data-driven dashboards and a Data Analytics certification. Strong analytical and problem-solving abilities, coupled with a commitment to continuous learning and delivering innovative technology solutions.

EDUCATION

B.Tech in Computer Science Engineering (AI/ML) 2024 - Present

Babu Banarsi Das Institute of Technology and Management, Uttar Pradesh, Lucknow Campus • CGPA — 7.1 (Till 4th Sem)

Class 12 (ISC) May 2023

Christ Church College, Lucknow • Percentage — 83.1%

Class 10 (ICSE) July 2021

Christ Church College, Lucknow • Percentage — 89.6%

SKILLS

Languages: C, Python, Java, SQL

Databases: SQL, DBMS (Database Management Systems), MySQL, Query Optimization, Data Modeling

Web Technologies: HTML5, CSS3, JavaScript

Data Analytics & Visualization: Excel, Power BI, Pandas, Plotly, Streamlit, Data Cleaning & Reporting, ETL Processes

Tools & Platforms: Git, GitHub, VS Code, Cloud Computing

Core Concepts: OOP, DSA, DBMS, SQL, Machine Learning, Agile Methodologies, Team Collaboration

EXPERIENCE

Data Analytics Intern | Unified Mentor Pvt. Ltd. May 2026 - Present • Remote

- Working on real-world data analytics projects involving data cleaning, visualization, and reporting.
- Using Excel, Power BI, SQL, and Python to analyze datasets and generate business insights.
- Building interactive dashboards and assisting in KPI tracking and performance analysis.
- Collaborating with mentors and team members to solve analytical and business challenges.

PROJECTS

Ferry Analytics — Ferry Capacity Utilization & Operational Efficiency Dashboard

Tech Stack: Python, Streamlit, Pandas, Plotly, SQL, Data Visualization

Built and deployed an interactive dashboard analyzing ferry ticket sales and redemption data across Jack Layton Ferry Terminal, Centre Island, Hanlan's Point, and Ward's Island (Toronto), spanning 2015–2025. Engineered metrics — Capacity Utilization Ratio, Congestion Pressure Index, Idle Capacity, Peak OLI, and Variability Score — to flag under-utilized and over-capacity periods.

- Added configurable filters for year, season, and time granularity (15-minute, hourly, daily) with adjustable congestion thresholds.
- Designed dedicated views for Activity & OLI trends, Redemption Pressure, and Interval Distribution to support operational decision-making.
- Deployed as a live Streamlit web application for real-time exploration.

UK Top 50 Music Dashboard

Tech Stack: Python, Streamlit, Pandas, Plotly, Data Visualization

Designed and developed an interactive music analytics dashboard using Python, Streamlit, Pandas, and Plotly, providing insights into UK Top 50 chart rankings, artist popularity, and music trends through dynamic, real-time visualizations. Deployed as a live web application.

EXTRACURRICULAR ACTIVITIES

- Solution Challenge 2026: Build with AI — Prototype Submission Participant | Hack2Skill (H2S)
- Tata - GenAI Powered Data Analytics Job Simulation
- Deloitte Australia - Data Analytics Job Simulation
- Google Developer Program Member | Google for Developers
- UI/UX Design Lab Participant | NIELIT
- Data Structures & Algorithms (DSA) Practitioner | LeetCode

CERTIFICATES

- Solution Challenge 2026: Build with AI — Certificate of Participation, Hack2Skill (H2S) (July 2026)
- Oracle Cloud Infrastructure 2025 AI Foundations Associate — Oracle
- Tata's GenAI Powered Data Analytics — Forage • Deloitte Australia Powered Data Analytics — Forage
- UI/UX Design Certification — NIELIT (October 2025)
